The APICS CSCP (Certified Supply Chain Professional) program is the most widely recognized educational program designed for the operations and supply chain management professionals.

The Greater San Jose Chapter of APICS is offering the APICS CSCP Preparation Course that will expand your supply chain knowledge and prepare you for the APICS Certified Supply Chain Professional certification exam.

Course Components

As part of the tuition for this course, you will receive the APICS CSCP Learning System – a certification exam preparation and professional development tool developed by APICS. Based on the most current APICS CSCP Exam Content Manual, this comprehensive training program combines print materials with interactive Web-based study tools to provide a customized learning experience.

Print Materials

Three print modules contain over 800 pages of content covering:

One:

Fundamentals of Supply Chain Management

Two:

Supply Chain Strategy, Design and Compliance

Three:

Implementation and Operations

Interactive Web-based Study Tools

- ❖ **Pretest** to determine knowledge level and prepare a study Plan
- ❖ **Progress check questions** after each section to test your understanding of concepts
- ❖ Test bank of more than **600 questions**
- ❖ A timed **post-test** to determine progress
- ❖ **eFlashcards** to test knowledge of relevant industry terms
- ❖ A Web-based **glossary**
- ❖ Access to the **Information Center** offering test-taking tips, feedback feature, and links to valuable resources
- ❖ Complimentary download of the most current **APICS CSCP Exam Content Manual** through the Information Center

Who can benefit from the program?

- ❖ People seeking in-depth knowledge of their company's supply chain
- ❖ Employees hoping to boost productivity and collaboration
- ❖ Innovators promoting global supply chain management
- ❖ Managers working to affect lead time, inventory, productivity and profits
- ❖ Supply chain professionals looking to secure their career

Why choose an Instructor-led course?

You'll benefit from

- ❖ An experienced instructor
- ❖ Interaction with peers
- ❖ A dynamic classroom environment that enhances learning
- ❖ Classroom expectations and assignments that help you stay on track

LinkedIn, Dave Viale, CFME@aol.com

Dave Viale is an educator, consultant, and writer. Prior to starting CFME, he worked for Arthur Andersen, Fairchild Semiconductor, and Hewlett Packard. He has held various Leadership positions and was a practicing CPA. He is the founder and president of CFME, an International Education, Training and Consulting Company. He has taught for several universities and colleges. With this diverse background, he brings a cross functional perspective to his consulting, classes, speeches, seminars, and key executive presentations, which he delivers across the U.S., Canada, Europe, and the Far East. He has given the APICS, CPIM and CSCP Certification Classes and Supply Chain Workshops for many years. He was the co-creator of the Program Management Workshop that became the standard for many of the Major Contract Manufacturing Companies.

Building on his TQC, JIT experiences, Dave has expanded CFME's product offering with the "Lean All The Enterprise Workshop Series and Consulting Package". Most classes, workshops and seminars on The Lean Enterprise/Six Sigma deal primarily with the manufacturing area and to a lesser extent, the customer and the supplier functions (loops).

The APICS CSCP Learning System

The APICS CSCP Learning System is a comprehensive professional development and exam preparation program. It consists of three print modules and web-based study tools that reflect the entire **APICS CSCP Exam Content Manual (ECM)** and provides you with a broad view of global end-to-end supply chain management.

The APICS CSCP Learning System is enhanced to support the recent structural and content changes to the APICS CSCP exam. Each module will further empower you with an understanding of best practices, techniques and technologies necessary to maximize your organization's efficiency and impact the bottom line.

MODULE 1

APICS Fundamentals of Supply Chain Management

- Broad concepts of supply chain management, including primary processes, objectives, integration methods and benefits
- Alignment of supply chain and business strategies
- Key considerations for supply chain design and continuous improvement
- Key measures for planning and controlling inventories
- Fundamentals of logistics in supply chain management
- Identifying and managing market segments
- Demand forecasting and management techniques
- Keys to effective Customer Relationship Management (CRM)
- Core concepts of supply management

MODULE 2

APICS Supply Chain Strategy, Design, and Compliance

- Sustainability practices in design and operation of a supply chain
- Risk, its sources, impacts, and mitigation methods
- Globally dispersed supply and demand, and the impact of free trade zones and trading blocks
- Globalization effects on inbound and outbound logistics
- Measurement of, and efficiency and responsiveness, in the supply chain
- Technologies for design, data, operations and communications in supply chain management
- Factors influencing demand, including design, marketing, selling, and matching customer orders
- Core concepts of CRM, including strategies, technologies, and key implementation challenges
- Fundamentals of Supplier Relationship Management (SRM), including strategies, improved management of sources, relevant technologies and measurement
- Inventory planning and control methods

MODULE 3

APICS Implementation and Operations

- Supply chain dynamics and the balance of responsiveness and efficiency
- Managing supply from internal and external sources
- Implementation of demand plans, including prioritization and fulfillment, and capturing and communicating point-of-sale data
- Tools and techniques to support continuous improvement strategies
